

SILVERADO BELMONT HILLS COVID-19 UPDATE

January 8, 2021

Dear Family and Friends,

I hope this email finds you well and looking forward to the New Year.

I unfortunately have to share that COVID-19 has hit our community. Several of our associates and dear residents have tested positive for the virus.

Our Welcome Center, which is our Bay neighborhood, has become our red zone where our residents who have tested positive are located. We have tried as much as possible to have dedicated associates working in this area to help in decreasing the spread of the virus.

We continue to follow San Mateo County Public Health guidelines and are testing all residents and associates on a weekly basis. We will continue to test weekly and once we have two rounds of zero positive cases, we can consider resuming some kind of family visits.

We request your patience as all our associates are hands on with our residents to care for their needs. This includes our engagement staff, directors, and maintenance moving beds at a moment's notice and of course our nurses and care associates.

We continue to receive information on the vaccine and we anticipate being notified next week about the date and times of our vaccine clinic to be held here at Silverado Belmont Hills.

I still need a few CVS Consent Forms completed and am reaching out to specific families for their resident.

If our residents test positive to the COVID virus, we will discuss with their responsible party, if the timing is appropriate for the resident to receive the vaccination.

As always, if you have any questions, please contact me directly.

With Love and Gratitude,

Joan Newman
